

# ABOUT IDEATEC

Ideatec is a software provider based in Korea, specializing in the development and delivery of a no-code API and integration automation platform (iPaaS). During digital transformation, our customer-driven solutions enable businesses to automatically generate and integrate APIs without coding, streamlining business processes. Our code-free solutions make it easy for businesses to manage, build, and integrate systems without requiring IT expertise. In addition, we offer FIDO standard passwordless authentication solutions, enhancing security and providing a convenient, secure authentication environment for users. Our FIDO authentication solution enables secure, password-free user verification through biometric recognition and other advanced methods. Through these technologies, we help customers accelerate their digital transformation, maximize operational efficiency, and increase business value. As a software company, we have own R&D institute and has been cultivating technical experts, focusing on executives and senior development teams from large corporations and global companies. , with over 70% of its employees being technical professionals.
