& Efficiency

Uncompromised
Transparency
& Trust

Need comprehensive RL(Reinforcement Learning) data? Flitto is the optimal solution for you.

The performance of your AI relies heavily on the quality of the data, more so than its quantity. This becomes particularly critical for less common languages, low-resource languages, dialects and variants, and domain-specific languages. Here are your essentials:

Multilingual Corpus Text Data

Corpus data should cover a broad range of topics—websites, books, transcriptions, etc.—to ensure the model can understand as many aspects of the language as possible.

Reward Function/Data

The specifics of this function/data will depend on the problem to be solved, and using human raters or heuristics can generate initial reward signals.

Exploration/Interaction Data

Data derived from real interactions is crucial for training chatbots. It offers important insights into the practical usage of language within an interactive context.

AI Data Solutions

- Translation Corpus Dataset
- Acceptability Test
- Machine Translation Post-Editing (MTPE)

- Speech Recognition Dataset
- Speech Synthesis Dataset
- Scripted Speech Dataset
- Multi-Turn Speech Dataset

- Handwritten Text Dataset
- Printed Text Image Dataset
- Customized Text Image Dataset
- Transcription & Metadata

- Open-Domain Dialogue
- Topic & Intent Labeled Dialogue
- Natural Language Inference
- Response Evaluation

- Data Annotation
- Transcription
- Paraphrase Generation

Chat Translation with AI

Flitto Chat Translation is a real-time multilingual translation solution that enables communication in everyone's native language in all places that welcome foreign guests, such as information desks, tourist information centers, ticket offices, and many others.

The Best Real-Time Multilingual Solution to Welcome Global Guests!

Two-way real-time communication without any language restrictions

Accurate text conversion and translation with Flitto CT engine

API provided for customized services for businesses & organizations

Main Features

- Real-time voice translation

@ Flitto Place with AI

Flitto Place is a digital multilingual translation service that places the world in your hands. It is available in any place with many foreign visitors—not only for restaurant menus, but also for museums, art galleries, tourist attractions, traditional markets, local festivals, etc. With a QR code, upgrade your place into a space for global communication without language barriers.

Why choose Flitto Place

The most accurate and detail-oriented place translation

Streamlined operations of QR-enabled digital multilingual service

10+ languages supported & GPT-powered descriptions

"Before Flitto's QR translations, foreign guests didn't know what to expect from their meals. I'd even have to show them drinks from our fridge. But now, they order confidently and relish every bite. Plus, updating our ever-changing menu is as simple as uploading new images online. It's been a game-changer!"
